

MOHAMED KHALED

Flutter Developer | Mobile Applications | Cross-Platform Solutions

elgallantmohamed9@gmail.com | +20 1145836183 | Giza, Egypt | [linkedin.com/in/mohamed-elgallant](https://www.linkedin.com/in/mohamed-elgallant)

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of hands-on experience delivering scalable mobile and desktop applications, including production systems and end-to-end independent projects. Strong background in Clean Architecture, BLoC/Cubit, REST API integration, SQLite-based offline storage, psychological assessment workflows, automated reporting, and local file persistence. Focused on maintainable code, responsive user experiences, and reliable cross-platform delivery.

TECHNICAL EXPERTISE

Flutter & Architecture

Flutter, Dart, Clean Architecture, MVVM, MVC, BLoC, Cubit, Provider, get_it, SOLID, responsive UI, animations

Platforms & Delivery

Android, iOS, Windows Desktop, WebView, installers, Git, GitHub, build configuration, Gradle / SDK / Manifest troubleshooting

Data, APIs & Storage

REST APIs, JSON, Dio, Postman, Firebase Auth / Firestore / Realtime DB / FCM, SQLite (sqflite), local file storage & caching

Strengths

Psychological assessment flows, report generation, scoring logic, offline-first design, legacy code optimization, debugging & problem-solving

PROFESSIONAL EXPERIENCE

Flutter Developer | [ArabTesting AI](#)

Jun 2025 - Present Cairo, Egypt | On-site

- Develop and maintain psychological testing modules with multi-step assessment flows, scoring logic, dynamic reports, and notification handling.
- Build scalable features using Clean Architecture and BLoC/Cubit, with structured API integration and robust JSON data handling.
- Contribute to Android, iOS, and Windows Desktop delivery, including installer packaging, WebView integration, and build stability improvements.
- Resolve complex legacy and Android build issues across Gradle, SDK, and Manifest configurations while improving maintainability and release reliability.

Flutter Developer | [BlueZone Company \(Kuwait\)](#)

Mar 2025 - Jun 2025 Remote

- Delivered commercial Flutter features using modular, scalable architecture and responsive, pixel-accurate UI implementation.
- Implemented authentication and session flows, integrated REST APIs, and collaborated with backend teams to resolve data and JSON integration issues.
- Refactored legacy modules and addressed technical debt to improve code readability, maintainability, and application performance.

SELECTED PROJECTS

Psychological Scales Platform

Flutter psychological assessment platform | Architecture, testing flows, reports, and offline file access

- Contributed to the foundational app architecture and feature structure using Clean Architecture, dependency injection, and BLoC/Cubit state management.
- Implemented assessment and testing flows with structured steps, validation, scoring logic, and report-ready data handling.
- Built reporting-related functionality and designed a local file download flow so downloaded documents remain available on the device for later access.
- Supported maintainable integration between UI, application logic, APIs, and local persistence for a consistent user experience.

ArabTesting Platform

Cross-platform psychological testing solution | Android, iOS, and Windows Desktop

- Supported standardized assessment administration and data-driven reports through structured scoring logic and reusable test workflows.
- Worked across mobile and Windows Desktop delivery, including installer packaging, API integration, and WebView-supported flows.
- Improved legacy code and resolved Android configuration issues to help reduce build failures and strengthen release readiness.

Dar Al-Mustafa

End-to-end Flutter application | Fully developed independently with local SQLite data storage

- Built the application end-to-end, including project setup, UI implementation, application logic, data handling, and local persistence.
- Designed and implemented an offline-first SQLite data layer to keep core app data available locally without relying on continuous connectivity.
- Created a maintainable feature structure with responsive screens and reusable components to support future expansion and easier maintenance.

EDUCATION

Bachelor of Computer Science | Thebes Academy - Faculty of Computers & Information

Nov 2019 - Aug 2023 | Giza, Egypt

LANGUAGES

Arabic: Native | English: Professional Working Proficiency
